

Integrity:

**“WE FACED SOME
UNIQUE CHALLENGES
IN PLANNING OUR
NEW WAREHOUSE.**

For openers, building on a flood plain created a challenge because the floor of our new warehouse had to support the weight of tons of giant paper rolls. **Second**, the access road for our shipping and receiving traffic was right next to the construction site. With 65 trucks coming in and out of our warehouse and plant daily, we couldn't afford delays caused by construction.

The folks at Renier Construction had a perfect understanding of the challenge. They were innovative and worked well with our people to keep a very complicated project on schedule. During the process, not a single shipment was delayed and our new warehouse facility meets all of our specifications. We realize our demands were complex, but

**RENIER LISTENED,
UNDERSTOOD AND PULLED
IT OFF.”**
