

Integrity

“Renier Construction is the best and I wouldn’t consider anyone else to build our facilities. I don’t know why anyone would.”

We’ve had great success with both the facilities that we end up with and their communication and professionalism throughout the process.

We had regular meetings with them and they communicated with us step-by-step throughout the process. We knew what was going on the whole time and they were on-time and on-top of what was happening.

We built during the height of supply chain issues. And, here’s another feather in Renier’s cap, they saw it coming and ordered early to mitigate challenges. They were really good about setting the expectations early. Renier was vigilant and keen enough to order items in advance. The result speaks for itself. They delivered. And it was on time, on budget and our facility is perfect.

Throughout our projects, we have formed a great trust; we have a great relationship with Renier and we wouldn’t use anyone else. In fact, we didn’t consider anyone else for this project.

“With Renier, I never worried. They stand behind their builds. I knew that if things weren’t perfect, they would take care of it. I never did fret – they had my best interest in mind and they still do!”
